OBJECTIVE

Seeking a position with a highly collaborative team conducting design research and creating meaningful user experiences.

EXPERIENCE

Instructional Design & Development, DePaul University, Multimedia Specialist, August 2006 to March 2008

- Redesigned CSS course template used for all online courses within the School for New Learning.
- Designed & developed web sites and print materials for departmental promotion and events.
- Researched tools to streamline production processes and assisted with trainings.

Allstate, User Experience Architect Intern, June to August 2007

- Conducted a variety of user research, from interviews with key stakeholders to usability tests, to contextual inquiry.
- Gathered requirements and made design recommendations to the business based on research.
- Translated user research into design.
- Successfully joined project teams from the beginning, middle, and end of projects, as needed.

Beyondmedia Education, Technology Director, April 2002 to June 2006

- Designed & developed organizational and project web sites and all promotional print materials.
- Designed curriculum for and taught workshops in web design, photography, and video production for youth and young adults aged 8 to 26.
- Managed organizational budgeting and bookkeeping.
- Possess a strong understanding of running a small business.

Learning Insights, Web Design Intern, July 2000 to June 2001

- Produced HTML, JavaScript, and Flash content for e-learning course modules.
- Retouched and optimized images for the web.
